**API Instructions for
Bookings, Cancelation
& Tracking Status Update**

1. Overview
2. Requests
3. URL
4. Booking API
5. Cancellation API
6. Tracking Status Update
7. NDR for Undelivered & RTO

1. Overview

Integrate our platform with your favorite application using our restful API. All API requests follow REST rules in terms of resource naming convention, use HTTP method as action description.

2. Requests

All requests to the API must be made via HTTP / HTTPS. The Web API is completely RESTful and accepts POST request only.

3. URL

Our API url has some specific structure to make it easy to use, this structure will help us to identify the action and format that you expect without any additional parameter, the response will be in the JSON format

4. Booking API Details

Every request made to booking endpoint will require a request body formatted in JSON containing your booking content and metadata. This will include information such as the AWB number, your ref. no, consignee and consigner details and etc.

```
{  
  "awbno": "",  
  "refno": "",  
  "orginsrc": "",  
  "frmname": "",  
  "frmadd1": "",  
  "frmadd2": "",  
  "frmpincode": "",  
  "frmphone": "",  
  "toname": "",  
  "toadd1": "",  
  "toadd2": "",  
  "toarea": "",  
  "topincode": "",  
  "tophone": "",  
  "goodsname": "",  
  "goodsvalue": "",  
  "doctype": "",  
  "transmode": "",  
  "qty": "",  
  "weight": "",  
  "volweight": "",  
  "topayamt": "",  
  "codamt": "",  
  "invfiletype": "",  
  "invcopy": "",  
  "ewaybill": "",  
}
```

All above **red color** parameters are mandatory.

4.2 Sample Code (Postman Collection)

```
curl --location 'https://erpstcourier.com/ecom/v2/demobookings.php' \  
--header 'API-TOKEN: <your token here>' \  
--header 'Content-Type: application/json' \  
--data '[  
  {  
    "awbno": 52472512676,  
    "refno": "JNP233856",  
    "orginsrc": "TNTST",  
    "frmname": "Kabilan",  
    "frmadd1": "First Street, Chennai",  
    "frmadd2": "",  
    "frmpincode": "600028",  
    "frmphone": "9999999990",  
    "toname": "Parthiban",  
    "toadd1": "ST Courier, Head Office, Chennai",  
    "toadd2": "",  
    "toarea": "Chennai",  
    "topincode": "600001",  
    "tophone": "9999999990",  
    "goodsname": "",  
    "goodsvalue": "",  
    "doctype": "N",  
    "transmode": "S",  
    "qty": "1",  
    "weight": "13.725",  
    "volweight": "3.76",  
    "codamt": "0",  
    "invfiletype": "",  
    "invcopy": "0",  
    "ewaybill": ""  
  }  
'
```

Note: For automatic allocation of the AWB number, you need to submit the value as “**AUTO**” instead of a specific AWB number

4.3 Booking API Response

Successful Response:

```
[{"status":"1","awbno":"95051780250","result":"Success"}]
```

Un-Success Response:

```
[{"status":"0","result":"Invalid Customer Code..!"}]
```

Live Account:

URL: <https://erpstcourier.com/ecom/v2/bookingcancel.php>

Access Key: -

6. Status Push API Details

Based on the JSON format provided below, you are required to develop a webhook to collect tracking status updates. We push 100 transactions every 30 minutes. The transaction limit may increase or decrease depending on your booking count.

6.1 JSON Structure

```
{
  "apiData": [
    {
      "awbno": "53000567141",
      "trans_dtm": "2019-08-02 09:26:51",
      "trans_for": "Processed & Forwarded to Service Center",
      "trans_from": "TNKGR-Krishnagiri hub",
      "trans_to": "TNABR-AMBUR",
      "delv_staff": "",
      "status_code": "INT",
      "pod_image": ""
    },
    {
      "awbno": "53000566835",
      "trans_dtm": "2019-08-02 09:27:10",
      "trans_for": "Out for Delivery",
      "trans_from": "TNABR-AMBUR ",
      "trans_to": "Gandhi Nagar",
      "delv_staff": "Kumar-9876543210",
      "status_code": "DRS",
      "pod_image": ""
    }
  ]
}
```

Note: “pod_image” data you will be send as base64 encode format

6.2 Various Status Code

1. BK - Booked
2. INT - In Transit
3. DRS - Out for Delivery
4. DLV - Delivered
5. UD - Un Delivered
6. RTO - Return to Origin (Initiated)
7. RINT - RTO In Transit
8. RDRS - RTO Out for Delivery
9. RUD - RTO Un Delivered
10. RDL - RTO Delivered

7.1 NDR List for Undelivered

uds_code	uds_name
AD	Address Not Clear
